

## Interconnect Messaging Solutions

Openmind is the market leading supplier of dedicated messaging software products to the wholesale carrier industry. Our solutions enable wholesale carriers to provide a full messaging interconnect service to mobile operator clients.

- 🕒 **Message Hub Solutions**  
Wholesale carriers use Openmind to implement SMS and MMS messaging hubs. These hubs allow operator clients to exchange messages into networks they could not otherwise access. Operators grow revenues and provide full message termination options to their subscribers.

Openmind is working with its extensive customer base in the industry to extend hub solutions to the Instant Messaging domain.

- 🕒 **Security Solutions**  
Openmind Messaging Hubs easily upgrade to include Openmind security solutions that filter out fraudulent and spam messages before they reach client operator networks.
- 🕒 **Business Intelligence**  
Wholesale carriers must provide client operators with details on how messages have been routed and delivered. Openmind Assure gives client operators access to messaging traffic report via a secure web based interface.

**OPENMIND IS THE  
WORLD'S LEADING  
SUPPLIER OF  
MESSAGING  
SOLUTIONS TO  
THE WHOLESALE  
CARRIER INDUSTRY**

## Solution Enablers

### 🕒 Traffic Control - WOSMEX
